CQR Dentures were created by dental professionals and research scientists from the UK and USA seeking to improve the everyday life of denture wearers.

Why Choose CQR Dentures?

- **CQR Dentures** have been extensively researched to work in harmony with your jaw and mouth.
- **CQR Dentures** harness the power of your jaw muscles to provide a stable and effective denture.
- **CQR Dentures** generate a greater 'biting' force, allowing you to enjoy the foods you like (often including difficult to eat foods like steak and peanuts!).
- **CQR Dentures** can improve your overall health as it is scientifically proven that chewing your food properly and eating a varied diet aids wellbeing.
- **CQR Dentures** are custom fitted by an accredited dental professional and are less likely to rub your gums or leave you with sore spots.
- **CQR Dentures** can have a very positive effect on your social and family life as they add to your confidence when laughing and speaking.

What patients say about CQR Dentures

"I've been eating peanuts for the first time in 35 years. I'd forgotten how they taste!"

"I can look down a menu and choose whatever I like now. It's not just fish or soft chicken anymore. I'm on the steaks!"

"I can't believe how much better food taste now that I can actually chew them properly."

"I've never had so much comfort and confidence with a denture. Thank You!"

"I can actually eat raspberries and cashews again with out having to remove my dentures between handfuls."

Questions about CQR Dentures?

Can my old dentures be adapted to be CQR Dentures?

No, CQR Dentures are custom-made from new materials.

How long will my CQR Dentures last?
